

Lyon, 4<sup>th</sup> of March 2021

## **New dates for HyVolution 2021** **27th and 28th OCTOBER at the Paris Event Center**

GL events has decided to postpone the exhibition initially scheduled for 4th & 5th May, 2021 at Paris Event Center.

Faced with the current pandemic situation and its uncertainties, the organizers have made the most realistic decision, which is to announce that as a precautionary measure, the 2021 edition is further postponed. The health of exhibitors, employees, partners and visitors remains their No.1 priority.

**HyVolution will therefore now be held on 27th and 28th October, 2021 at the Paris Event Center (PEC) at Paris–La Villette.**

In a market at the centre of the news, HyVolution is gearing up in collaboration with France Hydrogen for this major gathering of all stakeholders in the market, covering the whole value chain of hydrogen in all the segments and regions.

“All the team in charge of organizing HyVolution is now set up to organize this postponed edition and make sure it is the go-to event in the French hydrogen sector. We know we can also count on commitment from our partners and from the 100 businesses already registered for the exhibition.”  
— Florence Mompou, Exhibition manager and Green Tech + divisional manager.

Hydrogen is more than ever at the heart of French and European news. Industry, heavy haulage, and research: a strategy with a budget of more than seven billion euros over ten years announced by the government will enable large-scale development of this energy form, the aim being to make key areas of the economy more sustainable.

All the hydrogen sector stakeholders are in motion to accelerate the roll-out of solutions and the completion of projects in order to present them at this next edition.

### **About the organizer**

With 200 trade or consumer events organized worldwide, GL events Exhibitions has unequalled expertise in organizing exhibitions and shows, a business that must at once satisfy increasingly specialized marketing, communication and organizational techniques while retaining close ties with market players.
